

## WORKSHOP:

### "BLOCKCHAIN AND RENEWABLE ENERGY GOVERNANCE"

DATE: 19. OCTOBER, 9:00-15:00

LOCATION: JOSÉ VICTORINO LASTARRIA, SANTIAGO DE CHILE

WORKING LANGUAGE: ENGLISH

Built from the success of previous Blockchain-Governance workshops organized by EKLA-KAS on Climate Finance (in Rio de Janeiro/Brasil) and Biodiversity Protection (in Lima Peru) the third will address Renewable Energy related to a specific Chilean project on "Registration of Renewable Energies from Solar Rooftop Facilities with a view to CO2 saving". The case intends to initiate a debate and thinking process on how renewable energy generally can be used with Blockchain technology. Therefore we invited experts from different disciplines, backgrounds and countries to explore corresponding potentials. Active participation and intervention is expected.
