DIGITALISATION AND BLOCKCHAIN – MOVING INTO IMPLEMENTATION FOR CLIMATE ACTION

In 2018 the Climate Ledger Initiative published the report *Navigating Blockchain & Climate Action*, noting the high potential of IT to accelerate Paris Agreement implementation. This event will focus on taking blockchain from theory to application-- highlighting experience to date and use cases in adaptation, renewable energy, international accounting and GHG markets.

Kaminzimmer

Tuesday 25 Jun 2019

18:30 - 20:00

PART 1 – INTRODUCTION TO BLOCKCHAIN AND THE CLIMATE LEDGER INITIATIVE

- **Heike Summer**, Government of Liechtenstein: Opening remarks
- **Martin Frick**, UNFCCC: Innovation, emerging new technologies and digitalisation in addressing climate change
- **Sven Braden**, LIFE Climate Foundation: Introduction of the Climate Ledger Initiative (CLI)
- **Nick Beglinger**, Cleantech21: Outline of the digital ecosystem 'trioka'

PART 2 – BLOCKCHAIN IN ACTION

- **Alexandre Gellert Paris**, UNFCCC: Blockchain innovation in the UNFCCC
- **Christian Huebner**, Konrad Adenauer Foundation: Blockchain technology for renewable energy development
- **Juerg Fuessler**, INFRAS: Blockchain for mitigation and adaptation
- **Uta Meier Hahn**, GIZ Blockchain Lab: Green Asset Wallet and Climate Mitigation Tokenization
- **Sven Braden**, LIFE Climate Foundation: The Liechtenstein Blockchain Act - Token economy for climate action
- **Country-specific** examples of climate-related blockchain activities, eg, from Mexico, Costa Rica

PART 3 – PANEL AND AUDIENCE DISCUSSION
